KEY TAKEAWAYS

- **16% Increase** in **Total Encounters** from the last epi week to the current epi week.
- **5% Decrease** in **Influenza Like Illness** cases were seen this epi week (#29) compared to the average of the previous 3 epi weeks (#28, 27, & 26).
- **56% Increase** in **Prolonged Fever** cases were seen this epi week (#29) compared to the average of the previous 3 epi weeks (#28, 27, & 26).
 - 1 Influenza case
 - 21 COVID-19 cases

Total Number of Influenza-like Illness (ILI) Cases Reported in the CNMI by Epi Week, 2023

ALERTS AND TRENDS

- ILI: Decrease from previous week (Green Down Arrow)
- PF: Increase from previous week (Red Up Arrow)
- AFR: Stable from previous week (Yellow Double Arrow)
- DIA: Increase from previous week (Red Up Arrow)

Syndromes	Epi Week				% Change from current week to previous 3 weeks	COVID Hospitalizations	
	29	28	27	26		Date Range	Totals
Acute Fever and Rash	0	0	0	0	Unstable	July 16 – July 22, 2023	0
Prolonged fever	13	11	6	8	56%	July 09 – July 15, 2023	1
Influenza-like illness	18	20	17	20	-5%	11/09/2021 – 07/22/2023	312
Diarrhea	9	7	10	9	4%

CNMI Weekly OD2A Surveillance Report

EPI WEEK 29 | EPI WEEK DATE: JULY 16 – JULY 22, 2023

WEEKLY CASE COUNTS											
POLYSUBSTANCE		OPIOID			STIMULANT			BENZODIAZEPINE			OTHER SUBSTANCE
OVERDOSE	MISUSE	OVERDOSE	OUD	MISUSE	OVERDOSE	SUD	MISUSE	OVERDOSE	SUD	MISUSE	OVERDOSE
0	0	0	0	0	0	0	3	0	0	0	0

NOTE: The encounters have been monitored since 2020. Some individuals might be involved in multiple cases or flagged multiple times for the same type of encounter in a single EPI week. The OD2A Surveillance has expanded to include Stimulant and Polysubstance cases in 2021, Benzodiazepine cases in 2022. The Polysubstance cases are also counted under respective categories. Prior cases of any overdose related encounters might be duplicated under Other Substance Overdose category. Other Substance category analysis is solely depending on indications from the providers' notes. The substances reported are not verified by NDC number or DEA substance database.

OD2A SURVEILLANCE: NUMBER OF PATIENT/ENCOUNTER FLAGGED by EPI WEEK 2023

CASE: DEFINITION	
OVERDOSE	Injury to the body (poisoning) that happens when a drug is taken in excessive amounts. An overdose can be fatal or nonfatal, accidental or intentional.
POLY-SUBSTANCE	The use of more than one drug, also known as polysubstance use, is common. This includes when two or more are taken together or within a short time period, either intentionally or unintentionally. Intentional polysubstance use occurs when a person takes a drug to increase or decrease the effects of a different drug or wants to experience the effects of the combination. Unintentional polysubstance use occurs when a person takes drugs that have been mixed or cut with other substances, like fentanyl, without their knowledge. Whether intentional or not, mixing drugs is never safe because the effects from combining drugs may be stronger and more unpredictable than one drug alone, and even deadly. *For OD2A Surveillance, Poly-Substance Use only includes encounters associated with Opioids, Stimulants, and/or Benzodiazepines.
MISUSE	The use of illegal drugs and/or the use of prescription drugs in a manner other than as directed by a doctor, such as use in greater amounts, more often, or longer than told to take a drug or using someone else's prescription.
OPIOID USE DISORDER	A problematic pattern of opioid, stimulant, or benzodiazepine uses that lead to serious impairment or distress. Diagnosing OUD/SUD/BUD requires a thorough evaluation, which may include obtaining the results of urine drug testing and prescription drug monitoring program (PDMP) reports, when OUD/SUD/BUD is suspected. A diagnosis is based on specific criteria such as unsuccessful efforts to cut down or control use, or use resulting in social problems and a failure to fulfill obligations at work, school, or home, among other criteria.
STIMULANT USE DISORDER	
BENZODIAZEPINE USE DISORDER	
SUSPECTED MISUSE	Any encounters that possibly leading to the above descriptions with such providers' comments as "requesting prescription refills (at emergency department)", "drug-seeking-behavior", and "frequent ER visitor for the same complaint for chronic pain and requesting 'stronger' medication". Also, cases where providers indicate there is possibility for misuse on the EHR system or when patients inform that they took Oxycodone (for example) and no PDMP data to support the patients' statement.

CNMI Weekly Notifiable Disease Report

EPI WEEK 29

EPI WEEK DATE: July 16 - July 22, 2023

In the table below, weekly and year to date counts are displayed through epi week 29. Additionally, a 3-year weekly average of incident counts comparing the incident count for this time period to the average of the previous 3 years (2020-2022) is included as well as incident rates for conditions that have counts greater than 20. Rates cannot be calculated for counts less than 20 due to statistical unreliability.

Condition	Epi Week 29	2023 YTD	3-year weekly average counts	2023 YTD Incidence Rates*	2022 Incidence Rates*
Enteric					
Campylobacter	1	13	0	25.3	81.6
Ciguatera fish poisoning	0	0	1	0.0	7.8
Salmonella	1	13	0	25.3	44.7
Environmental					
Elevated Blood Lead Levels	0	4	0	7.8	9.7
Sexually Transmitted					
Chlamydia	5	129	3	251.5	423.5
Gonorrhea	1	23	0	44.8	33.0
Syphilis	0	2	0	3.9	5.8
Respiratory					
COVID-19	21	733	70	1429.0	19061.7
Post-Vaccine	17	552	13	1076.1	12594.5
Tuberculosis					
TB, Confirmed	1	13	0	25.3	44.7
TB, Under Investigation	0	18	0.3	35.1	54.4

*Rate per 100,000; Data are preliminary and subject to change. CNMI population estimates were determined using 2022 & 2023 Census International Database (https://www.census.gov/data-tools/demo/idb/#/country?YR_ANIM=2021&COUNTRY_YR_ANIM=2021&FIPS_SINGLE=CQ)

CNMI Weekly Health & Vital Statistics Report

REPORTING PERIOD: EPI YEAR 2023 as of EPI WEEK 29

The statistics on births, deaths, and causes of deaths in this report are derived from birth and death registrations processed daily at the Health and Vital Statistics Office.

• Number of births: 15(304) • Average: 10(per week) • Infections present and/or treated during pregnancy: ○ Chlamydia: 1(4) ○ Gonorrhea: 0(0) ○ Syphilis: 0(0) ○ Hepatitis B: 1(1) ○ Hepatitis C: 0(0) ○ COVID-19: 0(0) • Substance use during pregnancy: ○ Cigarette smoking: 0(5) ○ Betelnut chewing: 2(18) ○ Betelnut chewing + tobacco: 2(16) ○ Alcohol use: 1(6) ○ Drug use: 2(8) • Maternal risk factors in pregnancy: ○ Pre-pregnancy DM: 0(8) ○ Gestational DM: 5(37) ○ Pre-pregnancy HTN: 1(13) ○ Gestational HTN: 0(17) • Infant risk factors (Low survival births) ○ Birth weight < 1500 grams: 0(5) ○ Birth weight < 2500 grams: 2(29) ○ Gestation age < 37 weeks: 2(29)	• Number of deaths: 5(127) • Average: 4(per week) • Number of deaths who received COVID-19 vaccine:<table><tr><th>Age range:</th><th>< 5</th><th>≥ 5</th><th>12-17</th><th>18 & over</th></tr><tr><td>N° of death</td><td>0(4)</td><td>0(0)</td><td>0(0)</td><td>5(123)</td></tr><tr><td>N° Vaccinated</td><td>0(0)</td><td>0(0)</td><td>0(0)</td><td>2(61)</td></tr><tr><td>% Vaccinated</td><td>0%</td><td>0%</td><td>0%</td><td>50%</td></tr></table> • Mortality Surveillance: 5(127) ○ Non-communicable diseases: 4(102) ▪ Cancer related deaths 3(29) ▪ Tobacco related deaths 1(15) ○ COVID-19 related deaths: 0(1) ▪ COVID-19 other contributing conditions¹ 0(4) ○ Fetal Deaths²: 0(2) ○ Infant Deaths: 0(4) ○ Children (aged 1 - 4 years) Deaths: 0(0) ○ Maternal Deaths: 0(0) ○ Accident or Injury Related Deaths³: 0(5) ▪ Drowning: 0(1) ▪ Suicide: 0(2) ▪ Traffic fatality: 0(1) ▪ Drug and/or opioid overdose: 0(1) ▪ Poisoning: 0(0)	Age range:	< 5	≥ 5	12-17	18 & over	N° of death	0(4)	0(0)	0(0)	5(123)	N° Vaccinated	0(0)	0(0)	0(0)	2(61)	% Vaccinated	0%	0%	0%	50%
Age range:	< 5	≥ 5	12-17	18 & over																	
N° of death	0(4)	0(0)	0(0)	5(123)																	
N° Vaccinated	0(0)	0(0)	0(0)	2(61)																	
% Vaccinated	0%	0%	0%	50%																	

¹ Other significant condition contributing to death but NOT resulting in the underlying cause. ² Fetal deaths = Fetus weighed ≥ 350 grams, or fetal demise > 20 weeks of completed gestation.

³ Accident or Injury related deaths = Manner of death beyond Natural Causes: accidental deaths (traffic and drowning), suicide, drug overdose, and poisoning.
