FOR IMMEDIATE RELEASE

Abbott voluntarily recalls powder formulas manufactured at one plant

Abbott (NYSE: ABT) is initiating a proactive, voluntary recall of powder formulas, including Similac, Alimentum and EleCare manufactured in Sturgis, Mich., one of the company's manufacturing facilities. The recall does not include any metabolic deficiency nutrition formulas.

Abbott is voluntarily recalling these products after four consumer complaints related to *Cronobacter sakazakii* or *Salmonella* Newport in infants who had consumed powder infant formula manufactured in this facility.

Additionally, as part of Abbott's quality processes, the company conduct routine testing for *Cronobacter sakazakii* and other pathogens in our manufacturing facilities. During testing in its Sturgis, Mich., facility, the company found evidence of *Cronobacter sakazakii* in the plant in non-product contact areas. The company found no evidence of *Salmonella* Newport. This investigation is ongoing.

Importantly, no distributed product has tested positive for the presence of either of these bacteria, and we continue to test. Abbott conducts extensive quality checks on each completed batch of infant formula, including microbiological analysis prior to release. All finished products are tested for *Cronobacter sakazakii*, *Salmonella* Newport and other pathogens and they must test negative before any product is released. Additionally, retained samples related to the three complaints for *Cronobacter sakazakii* tested negative for *Cronobacter sakazakii*. And the retained sample related to the complaint for *Salmonella* Newport tested negative for *Salmonella* Newport.

While Abbott's testing of finished product detected no pathogens, the company is taking action by recalling the powder formula manufactured in this facility with an expiration of April 1, 2022, or later. No Abbott liquid formulas, powder formulas, or nutrition products from other facilities are impacted by the recall.

Cronobacter sakazakii is commonly found in the environment and a variety of areas in the home. It can cause fever, poor feeding, excessive crying or low energy as well as other serious symptoms. It's important to follow the instructions for proper preparation, handling and storage of powder formulas.

"We know parents depend on us to provide them with the highest quality nutrition formulas," said Joe Manning, executive vice president, nutritional products, Abbott. "We're taking this action so parents

know they can trust us to meet our high standards, as well as theirs. We deeply regret the concern and inconvenience this situation will cause parents, caregivers and health care professionals."

What Parents and Caregivers Should Do

The products under recall have a multidigit number on the bottom of the container:

- The first two digits of the code are 22 through 37
- The code on the container contains K8, SH, or Z2
- And the expiration date is April 1, 2022, or later.

To find out if the product you have is included in this recall, visit similacrecall.com and type in the code on the bottom of the package, or call +1-800-986-8540 (U.S.) and follow the instructions provided. No action is needed for previously consumed product. If you have questions about feeding your child, contact your healthcare professional.

Some product was distributed to countries outside the U.S. A list of these products can be found at similacrecall.com.

What should I do as a parent if I have an affected product at home?

- If you purchased or obtained your product in the United States, check the lot number with the lot locator at similacrecall.com.
- If your product is not affected by the recall, no action is necessary and you can continue to use it.

What do I do if my product is affected by the recall?

If your product is affected by the recall, do not use it and go to similacrecall.com for a refund or replacement, depending on how the product was acquired or the type of product. You should seek safe, alternative feeding options and talk to your pediatrician or healthcare provider. You can also call Similac customer service at 1-800-986-8540.
